

Series 6A Seamless Glass

SERIES 6A SEAMLESS GLASS DASHER SYSTEM

Clearly The Best

Professional teams and multi-use arenas understand the need to provide fans with a clear, unobstructed view of the game. The patented* Crystaplex Series 6A Seamless Glass System eliminates the clutter that typically limits spectator and camera viewing—bringing the action closer to the fan. The Series 6A Seamless is a natural evolution in response to the clear needs of the rapidly growing hockey industry.

The Series 6A Seamless Glass Dasher System starts with our lightweight, 6-inch aluminum frame, providing a wide base of support for stability, and the ability to perform quick, efficient changeovers.

SUPERIOR VISIBILITY

- The tempered glass offers a clear view and is easy to maintain.
- Our seamless system requires no vertical shield supports, offering fantastic spectator and television camera views of the game.

DURABLE AND FLEXIBLE

- Designed to dismantle easily for efficient changeovers.

CHECKFLEX™—THE BOARD SYSTEM WITH IMPACT

- The Series 6 Seamless Glass System is available with Crystaplex's revolutionary CheckFlex™ Platinum—state-of-the-art impact absorption and board flexibility that players have been demanding.

"We have a small arena with bleachers on both sides, and numerous visual obstacles. Our Crystaplex Series 6A Seamless System has helped us dramatically improve our sight lines, making us the best arena in our area for watching games. We've had numerous compliments on our rink from players, fans....everyone."

* Covered by U.S. Patent Nos. 5,953,882 and 5,706,625

Series 6A Seamless Glass

SEAMLESS GLASS DASHER SYSTEM

All Crystaplex Dasher Board Systems are complete with a full set of architectural shop drawings, and proper working drawings for your facility personnel. Your staff are instructed in the proper procedures for fast and safe changeovers before our trained installation crew leaves the site.

LONG-LASTING ALUMINUM FRAME

Reliable and durable, aluminum does not rust and requires little maintenance. The expansion co-efficient is similar to plastic, reducing contraction problems and providing the right flexibility.

SEAMLESS GLASS SHIELDS

Tempered glass shields are easy to maintain and are strong enough to maintain integrity without vertical shield supports.

U-4 channel requires no vertical shield and eliminates bad puck bounces off the supports. Reduces poor visibility—particularly in the premium seats that are behind the boxes.

ENGINEERED FOR IMPACT AND ACTION

Aluminum produces the same yield strength of similar steel systems with the right amount of flex—accommodating players while providing lively puck play. The combination of tubes and channel results in a long-lasting system. Every system is customized to each facility's requirements.

EASY, EFFICIENT CHANGEOVERS

Shield Lock[®] allows quick, efficient removal of the shields.

Anchor plates allow quick removal and setup without loose parts. Strong attachments do not fail and can adapt to existing layouts without compromise.

OPTIONS:

Ice Dam Protects ice edge integrity when boards are removed. Custom fit to board system.

Glass and Board Storage Carts Heavy duty "A" frame carts on castors for easy storage of boards, shields, and supports.

Electric Shield Remover Attaches to any lift truck. Protects glass during removal and installation.

Aluminum (Concert) Lift Out Gates Aluminum lift out gates or sections are light and easy to handle. Provide aisle access to arena floor for various events.

Backer Panels Encloses dasher boards with StayWhite[™] poly for easier cleaning and improved aesthetics.

Ad Board Kits Available as a source for revenue generation. Can be pre-installed.

Supportless Goal Judge Box Does not impair sight lines from key seats.

Lift Gate A vertical lifting machine gate ideal for facilities with limited space. With push-button control from your ice resurfer, this gate is a real labor and time saver.
