

GamePlex™ is Athletica's completely portable, semi-portable or permanent rink system made of rotationally-molded plastic. This versatile rink system was designed for indoor or outdoor use, for in-line hockey, ice hockey, indoor soccer, arena football, lacrosse and more. GamePlex rinks offer excellent safety and game containment, as well as good ball and puck action off the boards. Intended for use with or without containment, this affordable rink system is easy to install, and has virtually no maintenance requirements.

GAMEPLEX : THE CHOICE IS CLEAR

SAFETY

Safety was the number one concern when we designed GamePlex. Made from rotationally-molded plastic, the patented impact-absorbing panels are durable yet flex upon contact. In addition, every edge is rounded for safety. Whether you're playing hockey, soccer, football or another game, the GamePlex system is working to keep the players safe.

AFFORDABILITY

GamePlex was designed for the budget-conscious professional. A rink measuring 186' x 86'(official size for in-line or ice hockey) is available for approximately half the cost of a traditional rink system.

DURABILITY

The rotationally-molded plastic panels hold up to aggressive play and are UV-stabilized to protect against sunlight and heat. In addition, GamePlex panels are warrantied to -40° F for outdoor ice hockey applications.

ADJUSTABLE SIZING

Adjusting the length and width of a GamePlex is very simple. Two smaller fields for young kids can be combined into one large field for older children or adults in just hours. This means that players of all ages can use this space for many recreational opportunities.

PORTABILITY

Since the standard GamePlex panel is just 42" high x 8' long, and weighs 90 lbs., it's easy to set up and tear down. Outriggers secure the rink without the need for anchoring into the surface. The interlocking panels secure with a connecting dowel and need no tools. This makes set-up and tear-down a snap.

VERSATILITY

GamePlex can be reconfigured from an in-line hockey rink to an indoor soccer field in minutes just by replacing a couple of end panels with removable soccer goals. GamePlex can also be quickly converted over to indoor football, indoor lacrosse or other games.

OPTIONAL ACCESSORIES

Mesh netting or acrylic shielding, additional player gates and penalty boxes are just a few of the options you can add to your GamePlex Rink System at any time. In addition to these options, you can add on to the length or width of your system at a later date if needed.

OPTIONAL ACCESSORIES:

SUPPORT

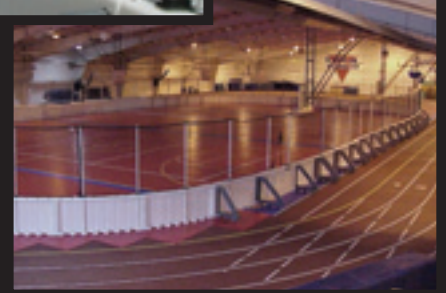

Portable Outriggers

- Portable/removable support leg that folds neatly into 8' panel for storage
- Can be filled with water or sand to add 50+ lbs of additional weight
- Features a pre-molded 3/4" stake hole for additional mounting options

Anchoring(Permanent)

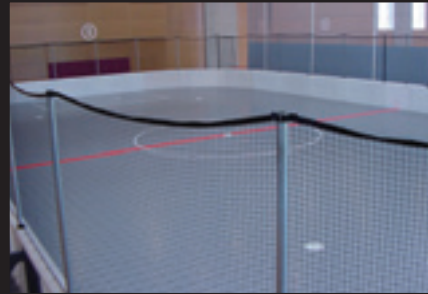

For permanent installation, surface may be core-drilled to allow for the insertion of steel poles along every 8' section. Anchoring holes are pre-molded every 12 inches along the backside of each panel to allow for custom installation.

UPPER CONTAINMENT

GamePlex Netting

- Standard 1-1/2" weather-treated nylon mesh supported by PVC or steel poles
- Bound on all four sides for easy installation
- The only recommended upper containment for outdoor use
- Allows wind to pass through without putting stress on the rink system
- Velcro closures are available above door panels on request

Acrylic Shielding

- Available in 3/8" or 1/2" thickness, and up to 8' height
- Recommended acrylic height and installation:
 - Portable = 3' or 4' high acrylic w/outrigger support
 - Permanent = any height acrylic up to 8' w/core-drilled holes
- Perfect for indoor use where a professional look is desired
- Specialized mounting system allows boards to flex and absorb shock on contact

Recreation professionals find that the GamePlex system offers the best mix of quality, flexibility and affordability for their situation.

"The students love the new system. It is mainly used for intramural floor hockey, but members and students also play volleyball, dodgeball and badminton inside the boards. The boards are constructed for easy set up and take down. Athletica did a great job of walking us through what we needed for our facility, from start to finish."

**Bobby Woodard, Recreation and Wellness Center Coordinator
University of Central Florida, Orlando, FL**

"As soon as I saw Athletica's GamePlex, I knew that was the perfect rink system for the atmosphere I was trying to create. Since GamePlex is made out of plastic, we knew it would give us the 'fun' look we were striving for, while also providing a safe environment for the players and the durability to withstand the wind, sun and rain to which it would be exposed."

**Jason Berg, President and Founder
Flow Hockey, Chicago, IL**

"We were looking for a system to match our one-of-a-kind, state-of-the-art arena here in Steubenville. With the GamePlex Rink System and AstroGrass, we have created an indoor soccer sensation. We chose Athletica after extensive research within the industry, and the professional approach and quality service we received throughout the entire order process proved we had made the right decision."

**Raymond Saccoccia, Director of Activities
St. John Arena, Steubenville, OH**

"We purchased the GamePlex system because we were looking to buy a portable rink adaptable for in-line hockey. We chose GamePlex because of the high quality of the boards. Now, our center is able to host tournaments, guarantee player safety and display sponsor ads. The GamePlex is particularly suited for multi-purpose sports centers."

**Eric Saintrond, CEO/Owner
Belgian Health Promotion, Loverval, Belgium**

The GamePlex Advantage

GamePlex is able to combine the best features from portable rink options, and the best from permanent rink options, which maximizes its affordability, value and versatility:

Portable Rink Features:

**Versatile
Reconfiguration Possible
Virtually No Annual Maintenance Costs
Easily Stored/Transported
Easily Set Up
Inexpensive**

Permanent Rink Features:

**Sturdy
Consistently Ready For Play
Able To Withstand Outdoor Elements
Able To Withstand Aggressive Play**
